Reimagine Underwriting
with Arturo.

More Than Ever, It's Critical to Get Underwriting Right

Today's insurance industry is all about making the right decisions. On policies. On renewals. On future trajectories. In the face of great risk from climate change. In a time where end consumers just want it fast and easy. When on-site visits are time-consuming and costly.

At the beginning of the policy lifecycle, it's critical to get underwriting right. Arturo empowers you to decide with accuracy, confidence and intelligence.

Get Unrivaled Insights into the Condition of Properties

By leveraging the latest satellite, aerial, stratospheric balloon, drone and ground-level imagery, Arturo's artificial intelligence models help insurance carriers make smarter decisions throughout the policy lifecycle, from the property level to the portfolio level.

13%
increase in quote completion and conversion

20x lift
to risk identification by using roof condition scores

20%
improved accuracy and reduced premium leakage

Easily identify environmental or physical changes from the initial quote to mitigate risk, reduce inspections and drive a higher return on investment.

RIGHT INSIGHTS. RIGHT TIME. RIGHT WAY.

• **Create exceptional policyholder experience** with pre-fill data and quotes your policyholders can trust.

• **Reduce need for inspections** with on-demand property insights.

• **Get unbeatable roof condition attribution with** Arturo's multi-source imagery and wide breadth of claims data.
